

Newtuple Design Language Guideline (Unified System for All Collateral)

1. Introduction

Purpose: This document defines Newtuple's unified design language — a living, system-driven guide ensuring visual and experiential consistency across **all touchpoints**: website, dashboards, presentations, booths, videos, and marketing material.

Scope: Applicable to all brand expressions - digital (web, UI, dashboards, slides, social) and physical (print, booth design, environmental graphics).

Core Principles:

- **Minimalism** – Remove the unnecessary; design for clarity and focus.
- **Clarity** – Prioritize readable hierarchy and clean information flow.
- **Sophistication** – Express technical mastery through visual restraint.
- **Reliability** – Build trust through consistent patterns and tone.
- **Human + Technical Balance** – Combine empathy with precision.
- **Cobalt Signature** – The cobalt blue logo color (#0047AB) anchors every visual system.

2. Brand Identity Overview

Brand Essence: Building the agentic enterprise future where humans pilot and AI agents execute.

Brand Personality: Professional, intelligent, reliable, technically sophisticated, and warmly human.

Voice & Tone:

- **Visual Voice:** Minimal, open, and precise: less decoration, more purpose.
- **Copy Tone:** Confident yet conversational; authoritative, never arrogant.
- **Interaction Style:** Predictable, smooth, and intentional.

Mission Tagline: *Build Your Agentic Enterprise.*

Design Philosophy: Each design decision reflects *calm precision*. Motion and contrast guide attention rather than demand it.

3. Logo Guidelines

Primary Logo: The official **Newtuple logo** in **Cobalt Blue (#0047AB)** as shown above. This is the master mark: it must not be altered, recolored, or distorted.

Usage Rules:

- Maintain clear space equal to the height of the “N” on all sides.
- Logo should appear on white or neutral backgrounds only.
- Never apply effects, gradients, or shadows.

Variants:

- **Primary:** Blue on white (default for all digital and print media).
- **Inverse:** White on blue (use for dark or Cobalt backgrounds).
- **Monogram:** The “N” can be used alone for icons or favicons.

Minimum Sizes:

- Digital: 32px height.
- Print: 10mm height.

4. Color Palette

Primary Palette:

- **Cobalt Blue:** #0047AB — Signature brand color, symbolizing intelligence and trust.

- **White:** #FFFFFF — Primary background and whitespace.
- **Black:** #000000 — Strong accents and typography.
- **Gray 900 / 600 / 50:** Supporting neutrals for depth and accessibility.

Accent Gradient:

- from-[#0047AB] to-[#00B8D9] — Used only for hero text or select motion backgrounds.

Functional Colors:

- Green 500 — Success states.
- Yellow 500 — Highlights or integration indicators.
- Red / Amber — Warnings or lifecycle transitions.

Usage Notes:

- Cobalt Blue is used sparingly and purposefully — never decorative.
- White is dominant; it embodies space and clarity.
- Gradients are rare, used only for emphasis.

5. Typography & Fonts

Primary Font: System font stack for scalability and neutrality.

Font Weights:

- ExtraLight – Hero and key statements.
- Light – Body and descriptions.
- Medium – Buttons, labels.
- SemiBold – Section headers.
- Bold – Numeric data or emphasis.

Hierarchy:

- **H1:** Large, extra-light, tracking-tight.
- **H2:** Light, wide-spaced section headers.
- **H3:** Compact, elegant, light.
- **Body:** Relaxed line height, gray-600.
- **Labels:** Uppercase, small, tracking-wider.

Cross-Medium Guidance:

- **Web/UI:** Responsive sizing with rem units.
- **Slides:** Larger type ratios for distant readability.
- **Print:** Adjust contrast, slightly tighter spacing.

Use case	Font	Weight	Example Size
H1 – Hero	Inter ExtraLight (200)	64–72 pt	
H2 – Section Header	Inter Light (300)	40–48 pt	
H3 – Subsection	Inter Regular (400)	28–36 pt	
Body Large	Inter Light (300)	20–22 pt	
Body Regular	Inter Light (300)	18–20 pt	
Labels / Buttons	Inter Medium (500)	12–16 pt	
Data / Metrics	Inter Semibold (600)	Variable (28–48 pt)	

6. Imagery & Illustration

Style: Abstract and geometric; avoid photography unless storytelling demands it.

Icons:

- Lucide React icons (outline only).
- Stroke: 1px, color inherits or Cobalt Blue.

Illustrations:

- Simple, flat geometry. Symbolize flow, connection, and intelligence.

Do's:

- Use monochrome imagery with selective Cobalt highlights.
- Use icons to clarify, not decorate.

Don'ts:

- Mix icon styles or colors.

- Use literal photography for technical products.

7. Layout & Composition

Grid: 12-column grid for web; modular for slides and print.

Spacing: Generous vertical rhythm (py - 20 – py - 32), consistent internal spacing (p - 8 – p - 12).

Whitespace Philosophy: White is as important as content; it allows sophistication and clarity to breathe.

Alignment:

- Text: Left-aligned for readability.
- Hero/Key visuals: Centered or balanced asymmetry.
- Booths: Centered for impact, grid-aligned signage.

Corners & Radius: Rounded-3xl for cards, rounded-full for buttons.

8. Motion & Interaction

Principle: Motion = clarity. Always purposeful, never decorative.

Durations: 300ms for hover, 500ms for transitions, 6s for background float.

Easing: ease-in-out.

Applications:

- Hover → subtle scale or color accent.
- Fade-ins → gentle, one-directional.
- Scroll effects → progressive, not parallax.

Cross-Medium Consistency: Motion tempo should remain consistent between website, videos, and on-screen loops at exhibitions.

9. Component Patterns

Primary CTA: Cobalt Blue background, white text, rounded-full.

Secondary CTA: White background, blue text with blue border.

Cards: Light gray background, border-gray-200, hover border-blue.

Sections: Max width 7xl, centered content, large breathing space.

Navigation: Fixed top, translucent white with subtle blur.

Footer: Cobalt Blue background, white text, clean grid layout.

Slide & Booth Parallels:

- CTA → Key message card.
 - Card → Content panel.
 - Navigation → Slide header strip.
 - Footer → Closing statement / contact band.
-

10. Accessibility & Responsiveness

- Minimum contrast ratio AA.
- Font size scales across screen types.
- Interactive elements include hover/focus states.
- Large text and high contrast in physical signage.

11. Verbal & Copy Guidelines

Voice: Calm authority. Speak like a practitioner, not a vendor.

Tone per Medium:

- **Web:** Direct, informative.
- **Slides:** Narrative, crisp, confident.
- **UI:** Clear and minimal.
- **Booth/Print:** Impactful, declarative.

Language Mechanics:

- Use active voice.
- Avoid buzzwords; use precise technical vocabulary.
- Always align copy with design tone: clarity > flair.

12. Signature Visual Elements

- **Cobalt Gradient Text:** from #0047AB → #00B8D9 for emphasis.
- **Floating Circles:** Cobalt/gray with slow movement.

- **Chevron Connector:** Represents process flow and transformation.
- **Backdrop Blur:** Metaphor for human clarity emerging from AI complexity.

13. Brand Expression Across Mediums

Medium	Primary Colors	Layout Behavior	Motion/Interaction	Example Use
Website/UI	White + Cobalt	12-column responsive	Subtle fade/hover	Product page, case study grid
Slide Decks	White base, Cobalt headers	16:9 modular grid	Appear by line	Case study storytelling
Print Collateral	Matte white, Cobalt ink	Symmetric margins	None	Brochures, one-pagers
Booth/Exhibition	Cobalt background, white text	Center-aligned	Ambient fade motion	LED wall, signage
Dashboards	Neutral gray base, Cobalt highlights	Card-based grid	Smooth transitions	Internal analytics UI

14. Summary

The **Newtuple Design Language** unites brand, product, and environment into a single, scalable identity system. It reflects the intelligence and precision of a company shaping the agentic enterprise era — calm, consistent, and confidently blue.

The **Cobalt Blue** from the logo is a symbol of clarity, trust, and technology in harmony with human design.
